Light field / dark text contrast

Primary lockups

RAGvidence

RAGvidence

One-color black

One-color white

Geist SemiBold for RAG; Geist Medium for videnc e. One uninterrupted name. Outlined SVGs and transparent PNGs.

Clear space and minimum size

x = ¼ of mark size.
Keep at least x clear on every side.

Primary mark: minimum 24px

RAGvidence

Horizontal lockup: minimum 160px width

For 16px use the dedicated favicon, which removes one fragment and widens the result. Keep full-size geometry for reports and documentation.

Small-size system

16×16

32×32

48×48

16px, 32px, and 48px are separate optical drawings; never substitute a squeezed wordmark.

180px Apple

192 / 512px app

Touch/app icons keep larger safe insets. Apple artwork is square and lets the platform apply its own mask.

× Do not stretch proportions

× Do not rotate the symbol

× Do not crop or crowd the mark

× Do not reduce contrast

Use dark Abyssal Teal on off-white, pale teal/white on near-black. Interactive teal is for dark surfaces; use Abyssal Teal for essential text on light. No gradients, shadows, glass, or added detail. The verification motif is brand meaning, not a pass/fail result badge.
